Software problem

In order of what to try first:

1. Check if program is running in task manager, if it is, close it in task manager and reopen it
2. restart computer
3. uninstal and reinstall program
4. destory computer and wonder why nothing works when it should

Keyboard issues

Keychron c2 keyboard - volume button not working properly?

Press **Fn + X + L (for ~4 seconds)** to enable function lock
